

Customize Duniya

Detailed Notes — Complete Handbook

An end-to-end reference for the corporate gifting ERP: architecture, roles, every module, workflows, statuses and data fields.

Generated Tuesday, 9 June 2026

1. Introduction

Customize Duniya is a full-stack ERP purpose-built for corporate gifting businesses. It manages the complete commercial lifecycle in a single web application — from finding and qualifying a lead, quoting and winning the deal, sourcing and assembling gift kits, through to shipping, invoicing and collecting payment. Sales, operations and finance teams all work off the same real-time data, with a live analytics dashboard giving leadership an at-a-glance view of business health.

The platform spans 8 functional areas and 21 modules. This document is the authoritative reference: it explains what each module does, the workflow and key actions it supports, the statuses records move through, and the exact data fields captured.

2. Architecture & Technology

Technology stack

Frontend	React + Vite, TypeScript, Tailwind CSS, shadcn/ui components
Backend	Express 5 (Node.js 24), session-based authentication
Database	PostgreSQL with Drizzle ORM
Validation	Zod schemas (drizzle-zod) shared across client and server
API contract	OpenAPI spec with Orval-generated React Query hooks
Structure	pnpm monorepo — separate API, web and shared library packages

Conventions

- **Currency** — Indian Rupee (₹) formatted with the en-IN locale throughout
- **Numbering** — Documents use prefixes — invoices 'INV', quotes 'QT' (configurable in Settings)
- **Tax** — GST handled on quotes and invoices; default rate configurable (18%)
- **Referential integrity** — Cascades and restrictions defined per relationship to protect transactional data

3. User Roles & Access

Users authenticate with email and password over a session. Each user carries a role that frames their day-to-day focus within the system.

Admin	Full access — manages users, settings and all modules
-------	---

Sales	CRM, quotes, sales orders and client-facing workflows
Warehouse	Inventory, goods receipts, assembly and shipments
Finance	Invoices, payments and credit notes

Demo credentials are available on the login screen for first-time access.

4. Dashboard

Dashboard */dashboard*

The landing page and real-time command centre. It pulls live data from the analytics API and is organised into a header with a global time-range filter, six KPI stat cards, two analytics charts, three insight widgets and a Top Clients list. All monetary values are shown in ¹ (en-IN).

Workflow & key actions

- **KPI cards** — Total Clients, Active Orders, Pending Assembly, Overdue Invoices, Low Stock Items, Pending POs
- **Charts** — Revenue Overview (3 / 6 / 12 / 24-month filter) and Sales Pipeline
- **Widgets** — Top Products, Sales Leaderboard, AR Aging, Top Clients

5. CRM — Customer Relationship Management

Clients */clients*

Directory of corporate client accounts and the hub for all relationship history.

Workflow & key actions

- **Manage accounts** — Create, search and filter clients by industry
- **Log interactions** — Record call / email / meeting notes against each client

Client fields

Field	Type	Notes
companyName	text	Required
contactPerson	text	Required
email	text	Required
phone	text	Optional
gstNumber	text	GSTIN
industry	text	Used for filtering
tags	text	Free-form labels
billingAddress / shippingAddress	text	

Client interaction fields

Field	Type	Notes
type	text	call / email / meeting
notes	text	Required

Contacts */clients/:id*

Multiple contact people maintained under each client, one of which can be marked primary.

Workflow & key actions

- **Primary flag** — Designate the main point of contact

Contact fields

Field	Type	Notes
firstName	text	Required
lastName	text	Optional

designation	text	Job title
department	text	
email / phone	text	
isPrimary	boolean	Default false
notes	text	

Activities */clients/:id*

A task and activity timeline attached to a client, tracking what is due and what is done.

Workflow & key actions

- **Track completion** — Capture due date and completion timestamp
- **Assign** — Attribute each activity to an owner

Activity fields

Field	Type	Notes
type	text	Required
subject	text	Required
description	text	
dueDate	timestamp	
completedAt	timestamp	Set when done
ownerId	ref !' users	Assigned user

Leads */leads*

The pipeline of potential new business, captured from various sources and qualified over time.

Workflow & key actions

- **Qualify** — Move leads through statuses
- **Estimate** — Capture estimated deal value and owner

Statuses: new, qualified, proposal, won, lost (default 'new')

Lead fields

Field	Type	Notes
title	text	Required
clientId	ref !' clients	Optional link
companyName / contactName	text	
email / phone	text	
source	text	Lead origin
status	text	Default 'new'
estimatedValue	numeric	¹
ownerId	ref !' users	Owner
notes	text	

Opportunities */opportunities*

Qualified deals being actively worked toward a close, with stage and probability tracking.

Workflow & key actions

- **Stage tracking** — Advance deals through the sales stages
- **Forecast** — Probability and expected close date feed the pipeline chart

Statuses: stage default 'prospect'; probability 0–100%

Opportunity fields

Field	Type	Notes
title	text	Required
clientId	ref !' clients	
leadId	ref !' leads	Converted from
stage	text	Default 'prospect'
value	numeric	¹
probability	integer	Default 50
expectedCloseDate	timestamp	

ownerId	ref !' users
notes	text

Quotes */quotes*

Quotation builder with line items, discount and GST. Quotes can be linked to an opportunity and converted into sales orders.

Workflow & key actions

- **Build** — Add line items with quantity and unit price
- **Price** — Apply discount % and auto-calculate GST and totals

Statuses: draft, sent, accepted (default 'draft')

Quote fields

Field	Type	Notes
quoteNumber	text	Unique
clientId	ref !' clients	Required
opportunityId	ref !' opps	Optional
status	text	Default 'draft'
validUntil	timestamp	
subtotal / gstAmount / totalAmount	numeric	1
discountPct	numeric	%
notes	text	

Quote item fields

Field	Type	Notes
description	text	Required
quantity	integer	
unitPrice / lineTotal	numeric	1

6. Catalog — Product Management

Products */products*

Master list of all sellable products with cost, selling price and stock, including low-stock highlighting.

Workflow & key actions

- **Stock alerts** — Threshold-based low-stock indicators
- **Sourcing** — Link a default vendor per product

Product fields

Field	Type	Notes
name	text	Required
category	text	Required
costPrice / sellingPrice	numeric	1
stockLevel	integer	Default 0
lowStockThreshold	integer	Default 10
vendorId	ref !' vendors	Default supplier
imageUrl	text	

Product Variants *(within Products)*

SKU-level variations of a product (size, colour, material) with their own stock and price adjustment.

Variant fields

Field	Type	Notes
sku	text	Unique
variantName	text	Required

size / color / material	text	Optional attributes
priceAdjustment	numeric	¹ +/-
stockLevel	integer	

Pricing Tiers *(within Products)*

Quantity-break pricing so larger orders get better unit rates.

Pricing tier fields

Field	Type	Notes
tierName	text	e.g. Bulk
minQuantity	integer	Threshold
unitPrice	numeric	¹ at this tier

Customization Options *(within Products)*

Add-on customisations such as engraving or printing, each with a price uplift and extra lead time.

Customization fields

Field	Type	Notes
optionType	text	e.g. Engraving
optionName	text	Required
description	text	
priceUplift	numeric	¹ added
leadTimeDays	integer	Extra days

Bundles */bundles*

Curated gift kits built from multiple products, with a helper to suggest bundles by occasion and budget.

Workflow & key actions

- **Suggest Bundle** — Generate a kit for an occasion within a budget

Bundle fields

Field	Type	Notes
name	text	Required
description	text	
occasion	text	e.g. Diwali
imageUrl	text	

Bundle item fields

Field	Type	Notes
productId	ref !' products	Required
quantity	integer	Default 1

Categories */categories*

Hierarchical organisation of the catalog with nested parent/child categories.

Category fields

Field	Type	Notes
name	text	Unique
slug	text	Unique URL key
parentId	ref !' categories	For nesting
description	text	

7. Orders & Procurement

Sales Orders */sales-orders*

Confirmed client orders moving through the fulfilment lifecycle, with line items and multiple delivery addresses.

Workflow & key actions

- **Build order** — Add products with quantity and unit price
- **Multi-drop** — Capture several delivery addresses per order

Statuses: Draft !' ... !' Delivered (default 'Draft')

Sales order fields

Field	Type	Notes
orderNumber	text	Unique
clientId	ref !' clients	Required
status	text	Default 'Draft'
totalAmount	numeric	¹
occasion / notes	text	

Order item fields

Field	Type	Notes
productId	ref !' products	Required
quantity	integer	
unitPrice	numeric	¹

Delivery address fields

Field	Type	Notes
name	text	Recipient
address	text	Required
city / pincode	text	

Purchase Orders */purchase-orders*

Procurement orders raised to vendors, optionally tied back-to-back to a sales order, with per-line received tracking.

Workflow & key actions

- **Raise PO** — Order products from a vendor
- **Receive** — Track received quantity per line toward full receipt

Statuses: Ordered !' Partially Received !' Fully Received (default 'Ordered')

Purchase order fields

Field	Type	Notes
poNumber	text	Unique
vendorId	ref !' vendors	Required
salesOrderId	ref !' sales orders	Optional
status	text	Default 'Ordered'
totalAmount	numeric	¹
expectedDelivery	timestamp	

PO item fields

Field	Type	Notes
productId	ref !' products	Required
quantity	integer	Ordered qty
unitPrice	numeric	¹
receivedQty	integer	Default 0

Vendors */vendors*

Supplier directory used across procurement, with expected lead times.

Vendor fields

Field	Type	Notes
name	text	Required

contactPerson	text	
email / phone	text	
leadTimeDays	integer	Default 7

8. Operations & Warehouse

Inventory */inventory*

Live stock levels with a movement ledger of every inward and outward adjustment.

Workflow & key actions

- **Record movement** — Log inward / outward stock changes with batch and reference

Inventory movement fields

Field	Type	Notes
productId	ref !' products	Required
type	text	inward / outward
quantity	integer	
batch	text	Batch ref
reference	text	Source document

Locations */locations*

The physical warehouse structure — zones and bins where stock is stored.

Statuses: type default 'storage'

Warehouse location fields

Field	Type	Notes
name	text	Required
code	text	Unique
zone / bin	text	
type	text	Default 'storage'
capacity	integer	
notes	text	

Goods Receipts (GRN) */grn*

Formal receiving of goods against purchase orders, including quality acceptance and rejection per line.

Workflow & key actions

- **Receive against PO** — Match incoming stock to the originating PO
- **Quality check** — Record received and rejected quantities

Statuses: received (default)

GRN fields

Field	Type	Notes
grnNumber	text	Unique
purchaseOrderId	ref !' POs	Required
receivedDate	timestamp	Defaults now
status	text	Default 'received'
notes	text	

GRN item fields

Field	Type	Notes
productId	ref !' products	Required
quantityReceived	integer	
quantityRejected	integer	Default 0
remarks	text	

Assembly /assembly

Production jobs that build gift kits for a sales order, tracking kit progress and per-item QC.

Workflow & key actions

- **Plan job** — Set target kit count for a sales order
- **Track progress** — Update completed kits and item QC status

Statuses: Pending !' In Progress !' Completed (default 'Pending')

Assembly job fields

Field	Type	Notes
jobNumber	text	Unique
salesOrderId	ref !' sales orders	Required
status	text	Default 'Pending'
totalKits	integer	Target
completedKits	integer	Default 0
notes	text	

Assembly item fields

Field	Type	Notes
productId	ref !' products	Required
quantity	integer	
status	text	Default 'Pending'
qcNotes	text	Quality check

Artwork /artwork

Creative approval workflow for branded gifts — mockups and logos signed off before production.

Workflow & key actions

- **Submit asset** — Attach artwork for a client / order
- **Approve** — Move through the approval status

Statuses: Pending !' Approved (default 'Pending')

Artwork approval fields

Field	Type	Notes
clientId	ref !' clients	Required
salesOrderId	ref !' sales orders	Optional
assetName	text	Required
assetUrl	text	Mockup / logo link
status	text	Default 'Pending'
notes	text	

9. Logistics

Shipments /shipments

Courier and delivery management, with per-parcel tracking across multiple delivery destinations.

Workflow & key actions

- **Dispatch** — Assign a courier partner and dispatch date
- **Track** — Tracking numbers at shipment and parcel level

Statuses: Preparing !' Dispatched !' Delivered (default 'Preparing')

Shipment fields

Field	Type	Notes
shipmentNumber	text	Unique
salesOrderId	ref !' sales orders	Required
courierPartner	text	Required
status	text	Default 'Preparing'

trackingNumber	text	
dispatchDate	timestamp	

Shipment item fields

Field	Type	Notes
deliveryAddressId	ref !' addresses	Optional
deliveryName / address	text	Required
status	text	Default 'Pending'
trackingNumber	text	Per-parcel

10. Finance

Invoices */invoices*

Tax invoices generated from sales orders, with GST broken out and a running status.

Workflow & key actions

- **Generate** — Create an invoice from a sales order
- **GST** — Net, GST and grand total captured separately

Statuses: Draft !' Sent !' Paid / Overdue (default 'Draft')

Invoice fields

Field	Type	Notes
invoiceNumber	text	Unique
salesOrderId	ref !' sales orders	Required
clientId	ref !' clients	Required
totalAmount	numeric	¹ net
gstAmount	numeric	¹ tax
grandTotal	numeric	¹ total
status	text	Default 'Draft'
dueDate	timestamp	

Payments */payments*

Money collected against invoices, supporting advance, partial and full receipts.

Workflow & key actions

- **Record receipt** — Log payment amount, type and date against an invoice

Statuses: type: advance / partial / full

Payment fields

Field	Type	Notes
invoiceId	ref !' invoices	Required
amount	numeric	¹
type	text	Required
paymentDate	timestamp	Required
notes	text	

Credit Notes */credit-notes*

Returns and billing adjustments issued against an invoice or client.

Workflow & key actions

- **Issue** — Record reason and amount for a credit

Statuses: issued (default)

Credit note fields

Field	Type	Notes
creditNoteNumber	text	Unique
invoiceId	ref !' invoices	Optional

clientId	ref !' clients	Required
amount	numeric	1
reason	text	Required
status	text	Default 'issued'
issuedDate	timestamp	Defaults now

11. Administration

Users */users*

Identity and access management — the people who use the system and their roles.

Workflow & key actions

- **Manage access** — Create users, set role, activate / deactivate

Statuses: roles: Admin, Sales, Warehouse, Finance (default 'Sales')

User fields

Field	Type	Notes
name	text	Required
email	text	Unique
passwordHash	text	Stored hashed
role	text	Default 'Sales'
isActive	boolean	Default true

Settings */settings*

Global company configuration used across documents — identity, tax IDs, document prefixes and currency.

Workflow & key actions

- **Branding & tax** — Company name, GST/PAN, contact and address
- **Document defaults** — Invoice / quote prefixes, default GST %, currency

Company settings fields

Field	Type	Notes
companyName / legalName	text	Defaults 'Customize Duniya'
gstNumber / pan	text	Tax IDs
email / phone / website	text	
address / city / state / pincode	text	
logoUrl	text	
invoicePrefix	text	Default 'INV'
quotePrefix	text	Default 'QT'
defaultGstPct	text	Default '18'
currency	text	Default 'INR'
